Mobile Moduel

Sales & Stock Management

Enhances efficiency, accuracy, and convenience in sales & inventory management

From Chaos to Control

- 1. Speeds up stock-taking by scanning barcodes or QR codes instead of manual counting.
- 2. Reduces the time required for inventory checks and audits.
- 3. Portable and can be used anywhere in the store or warehouse.
- 4. Eliminates the need to return to a central computer to update stock records.

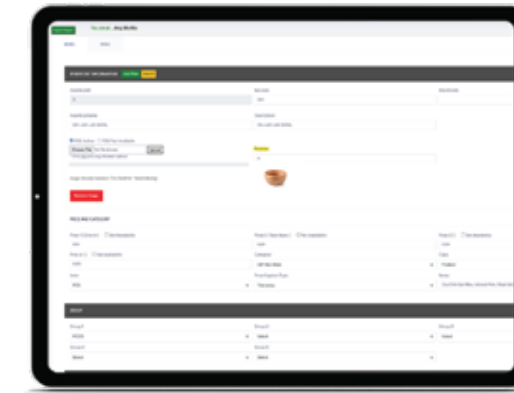

WHY IS MOBILE STOCK TAKE MODULE IMPORTANT?

A mobile view for a stock management module offers significant advantages by enhancing accessibility, efficiency, and real-time tracking. With mobile access, business owners and staff can manage stock anytime, anywhere without being tied to a desktop, ensuring inventory control remains seamless even on the go

Mobile Moduel

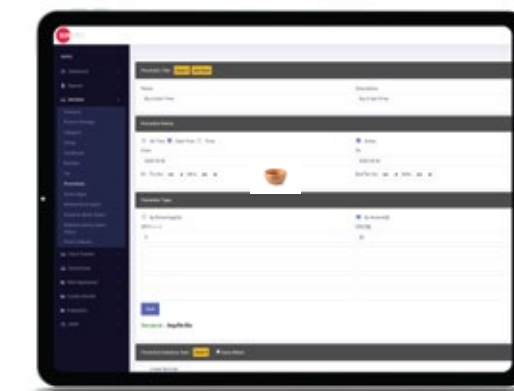

Product Management Module

Product Management Module in Suntoyo is essential for businesses to efficiently add, update, and manage their product catalog. We simplifies inventory tracking, pricing adjustments, and product availability, helping businesses avoid stock mismatches and pricing errors.

Let the magic happens under the hood

- 1. Add, Edit, and Organize Products – Manage product details directly from a mobile device.
- 2. Real-Time Sync with Suntoyo Cloud – Instant updates across all sales channels.
- 3. Product Variations Support – Manage different sizes, colors, and versions.
- 4. Pricing & Discount Management – Set and adjust prices, apply promotions, and schedule discounts.

SIMPLE STEPS, HUGE IMPROVEMENT

Suntoyo Product Management Module in a Mobile POS is essential for businesses to efficiently handle their product catalog, pricing, and inventory updates. It allows merchants to add, edit, and organize products directly from their mobile devices, ensuring seamless updates across all sales channels. With real-time synchronization to Suntoyo's cloud backend, any modifications to product details—such as price adjustments, stock availability, or category changes—are instantly reflected across the system.

Mobile Module

Sales Report Management

For businesses using POS systems, cloud-based management, data analytics is a game-changer. It drives smarter decision-making, improves efficiency, and maximizes profitability.

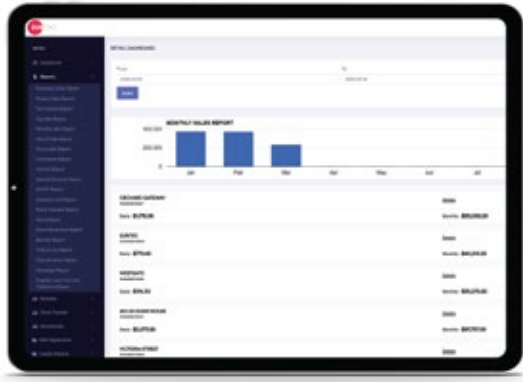

THE KEY TO SMARTER BUSINESS DECISIONS

Suntoyo sales report management module transforms raw information into valuable insights, enabling businesses to make informed decisions. In retail and POS systems, it helps track sales trends, optimize inventory, while real-time data enhances security by detecting fraud and inefficiencies. By leveraging data, businesses can streamline operations, reduce costs, and stay competitive in a rapidly changing market.

Data-driven decisions

- 1. Predictive Insights for Future Growth
- 2. Better Risk Management
- 3. Improved Operational Efficiency
- 4. Better Risk Management

POS & Self-serviced-kiosk Software

Smooth sailing

Suntoyo POS software provides real-time inventory updates, helping businesses avoid stock shortages or overstocking. It also generates detailed sales reports, allowing business owners to make data-driven decisions to boost profitability.

BENEFITS OF SUNTOYO POS SOFTWARE

1. **Faster Transactions** – Speeds up the checkout process, reducing wait times for customers.
2. **Real-Time Inventory Management** – Tracks stock levels automatically, preventing overselling or stock shortages.
3. **Sales Reporting & Analytics** – Provides insights into sales trends, best-selling products, and revenue performance.
4. **Multi-Payment Options** – Supports cash, credit cards, mobile payments, and digital wallets for customer convenience.
5. **Cloud Syncing & Remote Access** – Allows business owners to monitor sales and inventory from anywhere.
6. **Multi-Store Support** – Syncs inventory and sales data across multiple locations.

Self-Service-Kiosk

Conveniently self check-out

Reduce traffic and long queues

Customers can place orders through self-service kiosks whenever it is convenient for them, while businesses can utilise the area more effectively.

Accurate Order Placement

Eliminate any potential for error in taking orders. Customers will be accountable for errors in their orders as well due to self-service features.

Minimises Labour

Instead of working behind the counter, employees can concentrate on jobs that are more customer-focused.

Increasing ticket orders

Due to upsell opportunities and improved client privacy during the purchase process, self-service kiosks have demonstrated an increase in sales

Integrated payment gateway

Dimensions 380 (W) x 1511 (H) x 401 (D) mm

Docket System Kitchen Display System

Your seamless buddy to improve overall productivity. Streamline your kitchen operations with Suntoyo's innovative display system.

WHY IS KDS IMPORTANT FOR YOUR F&B OPERATION?

Introduce iKDS controls your kitchen and service moment. Equipping your kitchen with an all-in-one kitchen display system (KDS) optimises the kitchen order workflow in real-time. iKDS is optimised to control your kitchen workflows, services, and priorities. The iKDS highlights colour in real-time to alert preparation tasks, overtime, takeaway, and deliveries to ensure your crew is aware and has full control of your kitchen flow.

iKDS Controller view

Quick view to search for order history

- Kitchen Display System that provides a list of order history and intuitive search and print functionalities to ease your crew from hectic situations.

Controllers get an overview of what is the preparation status for all stations.

iKDS Kitchen view

Sperate view for multiple station

- Handle complicated situations by controlling the kitchen preparation flow

Say goodbye to order forms lining up the kitchen window. Go paperless with a system that works in both monitor and tablet.

QR Mobile Menu Ordering

Self Ordering & Payment Solution

With QR ordering, you can handle higher order volumes with fewer employees. In addition, your service crew can be redeployed to focus on areas that will increase productivity

SIMPLE STEPS, HUGE IMPROVEMENT

QR code-powered ordering lets you limit in-person contact, increase efficiency, and improve the customer experience.

- 1. Provide peace of mind to diners and staff by limiting contact and shared surfaces
- 2. Raise efficiency with improved table turn times
- 3. Give diners the freedom to order when they want—without waiting for a server
- 4. Make ordering easy and intuitive with a mobile-optimized menu and payment experience
- 5. Free up staff to focus on fulfilling orders and creating an optimal guest experience

Bring your own devices

Customers do not have to wait for service crew to take order or wait at the restaurant for food to be prepared. They can take their own order, make payment, fire them directly to the kitchen and be notified when the food is ready for collection.

- Handle higher order volumes with fewer employees
Orders are sent directly to your POS and kitchen from their mobile devices
Decrease physical order manually reduces time spend.

Bring your own devices (BYOD) All you need is QR code! Everything is web-based. Scan to start ordering! Dashboard management tools are accessible using any devices that support web browser

IQueue OS

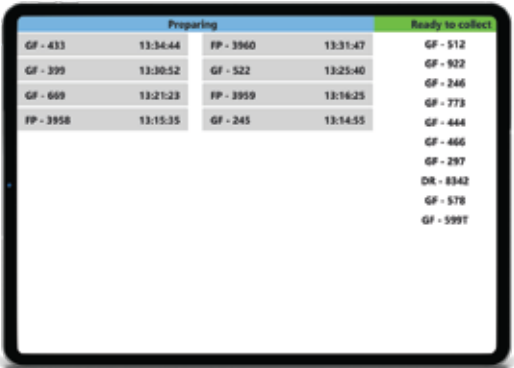

Automates your services

Be it simply showing queue information, or including media content, having a display is a highly effective means of communication with your customers.

DON'T KEEP YOUR CUSTOMERS WAITING ANYMORE

What we offer is automated queue software that is guaranteed to decrease customer wait times while increasing your revenue and service efficiency

- With our smart queuing system, you can say goodbye to long waiting and queuing forever.
- A queue system allows businesses to efficiently manage customer flow and improve the overall customer experience

IQueue Display

Complete Queue Management System QMS that fulfills your business queuing needs from a basic QMS queuing system to sophisticated queue solutions.

- Boost efficiency by eliminating rush hours
- View estimated wait times, and queue number

IQueue Service Terminal

Enables staff to call queue numbers based on different priorities, hold a Queue number or call for missed queue numbers. Additionally, they are able to revise the flow of their customer's visitation journey as per the needs of the customer.

- Display all numbers including the ones on call and those skipped
- Convenient to use with an excellent interface

Hardware

Mobile & Standard Hardware

Packed with power, Suntoyo POS hardware delivers top performance in a sleek, minimalistic design, elevating the checkout experience in retail and hospitality.
