CERTIFIED LASER SPECIALIST (HARVARD, USA)

22/03/2023

Roohan Reddy
T08712963

The a/w has very severe
atopic dermatitis since 2021.
Many courses of oral steroids,
Cyclosporin and topical steroids have
not produced any remission.
Today his skin is still flaring
and has developed steroid side
effects like moon-face, stretch marks.
So he has been started on
monthly Dupixent till
improvement occurs.
