

Replication Manager Foundations Assessment

Instructions: Select a single answer from all questions where the answers are preceded with parenthesis "()". Select one or more answers from all questions where the answers are preceded with brackets "[]". For any matching questions, enter the letter of the corresponding matching item inside of the brackets provided.

#	Question
MAIN QUESTION SET	
1.	What are two [2] benefits the Replication Manager family provides? ☐ Allows the management of replicas and backups of SQL environments ☐ Discovery of hosts, applications, and storage ☐ Help on the Zoning management of the environment ☐ Mount and un-mount replicas to one or more hosts
2.	What are three layers of Replication Manager architecture? ☐ Agents, Console and Infrastructure ☐ Console, Server Software and Replication Agents ☐ GUI, CLI and server software ☐ Server software, client software and management software
3.	Which two [2] statements about Replication Manager are correct? ☐ All the replications can be started manually by the administrator ☐ Replication Manager Architecture allows users to access the software from anywhere on the network ☐ The Replication Manager client software links to the storage array and manages that connection ☐ The Replication Manager Database does not store data about the InfoSets
4.	Which statement demonstrates the integration of RMSE with a Symmetrix system? ☐ All the volumes (Standards (STD), Business Continuanace Volumes (BCV), R1, and R2) are discovered automatically ☐ All the volumes (Standards (STD), Business Continuanace Volumes (BCV), R1, and R2) are eligible for replicas ☐ RM/SE automatically controls the complexities associated with creating, mounting, restoring, and expiring data replicas ☐ The InfoSet and the Solid Database updates the Storage configuration every 5 minutes

5. What are three User Account Levels for Replication Manager?

- ☐ Administrator, User, Operator
- ☐ ERM Administrator, Database Administrator, Operator
- ☐ InfoSet, Database Admin, User
- ☐ RM User, Operator, End User

6. What is the primary function of RM SE?

- ☐ Creation of LUNs and Storage Groups
- ☐ Creation of point-in-time disk-based replicas
- ☐ Management of hosts in Cluster environment
- ☐ Management of SQL 2000 Server and Exchange 2000/2003 Server databases

7. Which operating system supports RM SE Explorer?

- ☐ Windows 2000 Server, Linux and Windows XP
- ☐ Windows NT, Windows 2000 Server and Windows XP
- ☐ Windows NT, Windows 2003 Server and Linux
- ☐ Windows XP, Windows 2000 Server and Windows 2003 Server

8. Which two storage system series is supported by Replication Manager/SE?

- ☐ CX 200
- ☐ CX 300
- ☐ CX 400
- ☐ CX 2000

9. Which four [4] applications does RM/SE support?

- ☐ Win 2000 Exchange 2000
- ☐ Win 2000 Exchange 2003
- ☐ Win 2000 Exchange 5.5
- ☐ Win 2003 Oracle 9i
- ☐ Win 2003 SQL Server 2000
- ☐ Win 2003 SQL Server 2003
