

EMC Smarts Console
Last update 02/18/2013

Smarts health:

EMC Smarts health collection is part of the emc-smarts-console-collect package. No configuration is required if running EMC Smarts 9.2 and more.

Known issues:

- You may see in collector logs a line like this:

<pre>WARNING -- [2013-02-15 15:43:53 EST] -- SmDataIndicators::initializeStartClasses(): Class ICS_AutoActionManager doesn't exist, skipping...</pre>

This behavior is normal; you can safely ignore all warning in regards to classes that doesn't exist.
